PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of professional experience designing and developing scalable, high-throughput backend systems. Experienced in building communication platforms, event-driven architectures, and vendor integration frameworks. Proficient in Java, Spring Boot, Kafka, and Redis, with hands-on experience leading small teams and owning end-to-end feature delivery. Focused on writing clean, testable code and building reliable, impactful systems.

SKILLS SUMMARY

Languages: Java | Groovy | JavaScript

Frameworks: Spring | Spring Boot | Hibernate | JPA | Microservices | RESTful APIs

Databases: MySQL

Messaging & Cache: Apache Kafka | Redis

Build & Testing: Gradle | JUnit | Mockito | Spock

Tools: Git | Postman | Swagger | Bruno | Jira | Confluence

WORK EXPERIENCE

Software Engineer

03/2024 – Present | Jaipur, Rajasthan

Hyperface Technologies Private Limited

- Designed and developed a plug-and-play integration framework enabling banks to easily onboard and manage multiple vendor integrations with minimal effort.
- Own and manage a high-throughput communication platform delivering bulk and single notifications to up to 300k users across Email, SMS, and WhatsApp, including campaign-level analytics tracking delivery, engagement, and user responses.
- Implemented Kafka-based asynchronous processing to handle delivery and user-interaction callbacks at scale, ensuring reliable event consumption and accurate message status updates.
- Designing and developing an event-driven communication system that triggers personalized reminders across multiple channels based on user behavior signals, aimed at re-engaging customers and resuming their journey.
- Developed a vendor-agnostic voucher lifecycle and inventory system integrating 9 third-party vendors, reducing external API calls by 90% by caching and serving up to 50K vouchers from MySQL with scheduled sync jobs.
- Integrated multiple third-party APIs (payments, vouchers, credit lines) with retry mechanisms, secured using JWT-based authentication and filter-level audit logging.
- Optimized complex SQL queries and reduced redundant API calls by 40% using Redis caching for tokens and frequently accessed data.
- Achieved 90% unit test coverage and documented 80% of APIs using Swagger and Postman/Bruno collections.
- Mentored 2 junior engineers, conducted code reviews, and owned end-to-end feature delivery in a fast-paced Agile environment.

EDUCATION

Java Backend Development Certification

01/2023 – 12/2023 | Bengaluru, Karnataka

Masai School

Bachelor of Science (Computer Science)

04/2017 – 04/2023 | Una, Himachal Pradesh

Govt. Post Graduate College
